DETAILED ACTION

Election/Restrictions

In response to the Office Action dated 12/1/2006, Applicant canceled claims 1-19 and added new claims 20-72. New claims 20-72 contain claims directed to the following patentably distinct species:

Species A as seen in figs. 4A-7A; concave shaped region near distal end of arm.

Species B as seen in fig. 8A; looped shaped region near distal end of arm.

Species C as seen in fig. 8B; forked shaped region near distal end of arm.

The species are independent or distinct because the second regions of the arms of each species have different structure.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).
